### **The Chemistry Of Love & Lust | Zocalo Magazine - Tucson Arts And Culture**

An understanding of brain chemicals can provide answers. Lust is driven by the hormones testosterone in men and estrogen in women.

### **BBC Science | Human Body & Mind | Science of Love**

Sometimes intense chemistry is just strong mutual lust and nothing more. You're simply each other's physical "type" and lack, or don't bother.

## Love, Lust, and the Brain | Psychology Today

But inside the body there are definite chemical signs that cupid has fired his arrow. When it Lust is driven by the sex hormones testosterone and oestrogen.

A sadistic alien made of a strange unearthly chemical compound that has the same texture and density as a human body. However his body was much different.
