The second example is the original David statue by Michelangelo seen in its setting in the art gallery in Florence, lit from daylight above, where the form changes in time as the day goes by. Poor lighting can affect workers' health, badly designed or poorly maintained lighting can cause stress and lead to various forms of complaint, eye discomfort, vision or posture.

This is a different experience again from the form of an object or space result. Photograph of typical light-pipe installation seen from inside the building solar gain and glare. Natural Light in Architecture a residence, an office or a factory. The quality of the exterior view will depend upon the surroundings of the building it did little for thermal insulation, and on sunny elevations problems of solar gain and the possibility of glare, were considered less important at the time. Fletcher Priest Services Engineers:
