The psychiatrist immediately launches into his mini mental status exam, asking specific questions. In all psychodynamic therapies, the first goal is to establish a "therapeutic alliance" between therapist and client.

The tension in the session disappeared, and Stella remarked that she has always

This leader is seen as a savior, an omnipotent figure who knows what is really going on and has all the answers. We were interviewing a patient who was depressed, an African American woman, and we were trying to illustrate interviewing skills to medical students.

People are hard, yes. Extensive use of analysis of the transference relation  
Ethics of Honesty:
