Reviews of pertinent studies in these fields are boring to those with this prior knowledge and insuff While I agree with the central theme of the book, the author struggles to find the balance between an academic publication and a book for the general public. Are people's qualities determined by their experience and what makes us human nature or by their environment nurture? Nature via Nurture grapples with one of the perennial questions that face all students of the life sciences; namely, what controls our behavior: AmazonMusicStreammillionsofsongs.Genesnotonlypredeterminethebroad The main idea expressed in this book is that Genes are the underlying mechanisms for BOTH nature and nurture and as such these two are not in a fight they are collaborating factors. On the other hand, stuttering used to be ascribed solely to environmental Nature via Nurture: Genes. He also pokes holes in logical fallacies one hears all the time - for example, the assertion that a feature is not genetic because the specific genes have not and in some cases may not ever been identified.
