Seeing the Future in the Present Past | Issue | Philosophy Now

For this event to occur, you need to see a star near the end of its life. bet of seeing (with the naked eye) the progenitor of a star that is now.

Seeing Past the Present | KC KOLLEL

Seeing the Future in the Present Past. Siobhan Lyons perceives the flow of history in terms of organic growth and decay.

"This is the lesson that history teaches.

When the present is augmented by the past, you can get a sense of not only where you've been, but perhaps where you need to go. As deep.

You can stare at almost all stars for your whole life with zero chance that they will die. If we as a global civilisation are already in the midst of our own ruin, what does this tell us about progress?

Also, you have to take into account stars that you can see explode, and stars that Gamma ray bursts are thought to signal the deaths of very massive stars. Such an object is Betelgeuse in the constellation Orion. Therefore, the light coming from the star which carries its information takes roughly years to reach Earth.
